

# Adjustable Loupes

*Precision for Every Professional*

# Professional Magnification Meets Personal Style

ColorSight is designed for dentists who want more than a standard loupe. It offers a complete adjustable loupe system with colourful titanium frames, multiple magnification choices and ergonomic wearing comfort.

## Ideal for

- Dental students
- General dentists
- Hygienists
- Restorative dentists
- Endodontic beginners
- Clinical training and education
- Daily dental practice

Four Optical Options

## Galileo Lens

**Lightweight**  
**Easy to Adapt**  
**Perfect for Beginners**

The Galileo system is ideal for dentists and students who are starting their magnification journey. It provides a wide field of view, natural depth perception and comfortable daily use

## Galileo Lens

| Model | Magnification | Working Distance | Pupillary Distance Adjustment | Depth Of Field | Field Of View | Weight |
|-------|---------------|------------------|-------------------------------|----------------|---------------|--------|
| SF2.5 | 2.5X          | 300-580mm        | 50-80mm                       | 200mm          | 150-170mm     | 69g    |
| SF3.0 | 3.0X          | 300-580mm        | 50-80mm                       | 200mm          | 130-150mm     | 75g    |
| SF3.5 | 3.5X          | 300-580mm        | 50-80mm                       | 200mm          | 110-130mm     | 79g    |

### Key Benefits

- Lightweight design
- Wide field of view
- Easy adaptation
- Comfortable for long use
- Ideal entry-level magnification

### Best For

- Dental students
- General examination
- Hygiene procedures
- Restorative preparation
- First-time loupe users
- Long-hour daily practice

Four Optical Options

## Ergo Lens

**Better Posture**  
**Higher Magnification**  
**More Clinical Control**

Designed for improved posture and stronger magnification.

Helps dentists work more comfortably with better visual detail.

# Ergo Lens

| Model | Magnification | Working Distance | Pupillary Distance Adjustment | Depth Of Field | Field Of View | Weight |
|-------|---------------|------------------|-------------------------------|----------------|---------------|--------|
| SE3.5 | 3.5X          | 300-580mm        | 50-80mm                       | ±50mm          | 70-90mm       | 75g    |
| SE4.5 | 4.5X          | 300-580mm        | 50-80mm                       | ±50mm          | 50-80mm       | 80g    |
| SE5.5 | 5.5X          | 300-580mm        | 50-80mm                       | ±45mm          | 50-75mm       | 88g    |
| SE6.5 | 6.5X          | 300-580mm        | 50-80mm                       | ±40mm          | 45-70mm       | 87g    |

## Key Benefits

- Adjustable working position
- Improved posture support
- Higher magnification options
- Clear clinical detail
- Suitable for advanced daily procedures

## Best For

- Restorative dentistry
- Endodontic procedures
- Aesthetic dentistry
- Precision preparation
- Daily clinical work
- Dentists seeking ergonomic improvement

Four Optical Options

# Magnetic Lens

4.5X / 6.5X

interchangeable options

A magnetic interchangeable system designed for dentists who need flexible magnification in different clinical procedures.

# Magnetic Lens

| Model | Magnification | Working Distance | Pupillary Distance Adjustment | Depth Of Field | Field Of View | Weight |
|-------|---------------|------------------|-------------------------------|----------------|---------------|--------|
| SM    | 4.5X          | 300-580mm        | 50-80mm                       | 100mm          | 50-80mm       | 92g    |
|       | 5.5X          | 300-580mm        | 50-80mm                       | 80mm           | 45-70mm       | 95g    |

## Key Benefits

- Quick magnetic lens change
- One frame, multiple magnifications
- Better posture support
- Suitable for advanced daily clinical work

## Best For

- Endodontics
- Restorative dentistry
- Aesthetic dentistry
- Precision procedures

Four Optical Options

## PrismX Lens

Better Posture

Higher Magnification

More Clinical Control

High magnification for  
advanced precision dentistry.  
Suitable for dentists who  
need clearer detail in complex  
procedures

## PrismX Lens

| Model | Magnification | Working Distance | Pupillary Distance Adjustment | Depth Of Field | Field Of View | Weight |
|-------|---------------|------------------|-------------------------------|----------------|---------------|--------|
| SF4.0 | 4.0X          | 300-580mm        | 50-80mm                       | 80mm           | 150-170mm     | 89g    |
| SF5.0 | 5.0X          | 300-580mm        | 50-80mm                       | 80mm           | 130-150mm     | 92g    |
| SF6.0 | 6.0X          | 300-580mm        | 50-80mm                       | 80mm           | 110-130mm     | 95g    |

### Key Benefits

- Higher magnification
- Enhanced detail recognition
- Stable image quality
- Professional precision support
- Ideal for experienced loupe users

### Best For

- Endodontics
- Microsurgical procedures
- Fine restorative work
- Implant-related detail checking
- Complex clinical cases
- Advanced precision dentistry

A man with dark, wavy hair and a light beard is looking directly at the camera. He is holding a pair of light green-rimmed glasses with black adjustable components. The adjustable parts have markings for 40, 35, 30, and 25. The background is dark and out of focus.

# Adjustable Fit

Designed for better comfort  
posture and visual control

# 12 Colours for Every Clinical Personality

Match your loupe with your clinic style  
uniform or personality

# Multiple Optical Systems

Choose from Galileo, Angled, Magnetic Angled and Prism options
